Follow the movement!

Three solutions in one compact design!

FlexFold BT is a feeder, folder stacker combination capable of processing thin and thick items such as fitted sheets and blankets. A set of spreading clamps allows one or two operators to feed the unit from the center or outer positions. The unit can perform 2 primary folds and up to 3 crossfolds. The length and width of each item is measured for optimum accuracy. The folder can be supplied with a drop stacker or a side delivery table.
